4. Reading Interface Functions:

WAR AND PEACE successfully captured life's prom-
ises, challenges, joys, triumphs, and losses in a way
that no other novels has done before and after. In this
novel with more characters than any other I can
imagine; the main characters are Pierre Bezuhov,
Prince Andrey Bolkonsky, and Natasha Rostov, who
are all affected by the destabilization of the war Na-
poleon brought upon Russia in the early nineteenth
century. It is around them that the other characters
revolve. Even though the sheer size of this novel of
over a million words may discourage readers to pick it
up, the consuming nature of the story keeps a reader
glued to the book from the opening pages. The sheer
power of this romantic and adventurous story made
this classic story to survive as perhaps the best of all
times.

The essence of Power, which is what leads individu-
als to move nations is the ultimate question of War
and Peace. And this individuals or great men of his-
tory, are in reality the slave of history. That underlying
fact can be found in other Russian stories. UNION
